The 5-Minute Website Health Check: Is Your Site Losing You Customers?

Hey there, South African business owner! I've seen too many websites bleed customers because of simple fixes left undone. Take 5 minutes to run this checklist on your site. Tick off what's working—and spot what's not. If you're coming up short, Virtara's got your back.

1. Does Your Site Load in 3 Seconds or Less?

- Test it: Go to tools.virtara.co.za (or use Google's PageSpeed Insights).
- Why It Matters: Every extra second costs you 20% of your visitors. Slow sites = lost sales.
- Fix It: Better hosting or lighter images can slash load times.

2. Is Your Site Mobile-Friendly?

- Test It: Open your site on your phone. Is everything readable and clickable?
- Why It Matters: Over 60% of SA web traffic is mobile. If it's clunky, they're gone.
- Fix It: Responsive design makes it seamless on any screen.

3. Can Customers Find You on Google?

- Test It: Search your business name + city (e.g., "plumber Durban"). Are you on page 1?
- Why It Matters: If you're buried, you're invisible. SEO brings you to the top.
- Fix It: Keywords and local tweaks can boost your rank fast.

4. Is Your Call-to-Action Clear?

- Test It: Look at your homepage. Is there one obvious button (e.g., “Contact Us”)?
- Why It Matters: Confused visitors don’t buy. One clear next step doubles conversions.
- Fix It: Simplify your design to guide them.

5. Are You Losing Trust?

- Test It: Any broken links, outdated info, or missing contact details?
- Why It Matters: A sketchy site scares people off. Trust = sales.
- Fix It: A quick cleanup makes you look pro.

Your Score:

- 5/5? Your site’s a rockstar—keep it up!
- 3-4/5? You’re close, but leaks are costing you.
- 0-2/5? Ouch—your site’s screaming for help.

Next Step: Want to plug the gaps? Get a 30-minute Website Audit from Virtara for just R299. We’ll dig into your site and hand you a plan to win online. Claim it at virtara.co.za/audit.
